*Upon agreement with the party, the previous election result remains used by us for the purposes of our calculations, due to non-recognition by the opposition of the results of the election citing fraud and irregularities.

The number of Council delegates for EU full member parties is calculated as follows:

- Every full member party receives 1 base delegate.
- Parties can gain additional delegates based on their electoral success, which is calculated by dividing the party's vote total in the most recent national election by 500,000 and the respective vote share by 10%, if the country has a total population exceeding 250,000 inhabitants. The sum of the resulting numbers is rounded, to give the number of additional delegates.

$$\text{Number of Council Delegates} = 1 + \left\lfloor \frac{\text{Vote Total}}{500000} + \frac{\text{Vote Share}}{10\%} \right\rfloor$$

The number of Congress delegates for EU full member parties is calculated as follows: - Every member party receives 1 base delegate. - Full members receive 1 Congress delegate per Council delegate. - Parties can gain additional delegates based on their electoral success, which is calculated by dividing the party's vote total in the most recent national election by a value X, which depends on the total number of votes, and the respective vote share by 3%, if the country has a total population exceeding 250,000 inhabitants. The sum of the resulting numbers is rounded, to give the number of additional delegates.

$$\text{Number of Congress Delegates} = \text{Council Delegates} + 1 + \left\lfloor \frac{\text{Vote Total}}{X} + \frac{\text{Vote Share}}{3\%} \right\rfloor$$

with X =

- 100,000 for the first 3,000,000 votes
- 250,000 between 3,000,000 and 5,000,000 votes
- 500,000 for votes exceeding a total of 5,000,000 votes

A member party whose exact number of votes cannot be determined because it ran in an electoral alliance or coalition of parties will be allocated delegates as follows: the vote total of the coalition is divided by the total number of the elected coalition's MPs and then multiplied by the number of MPs that were elected from the ALDE member party.

The total number of non-EU delegates cannot exceed 1/3 of the total number of EU delegates. This will be implemented with the following procedure:

- The maximum number for non-EU delegates is determined as

$$\text{Maximum Number of Non-EU Delegates} = \frac{\text{EU Delegates}}{2} - 1$$

- The difference between the sum of regular non-EU delegates and the *maximum* number of non-EU delegates gives the number of delegates that have to be deducted from non-EU delegations.
